Portfolio: suyesh-shinde-pfp.netlify.app

SUMMARY

B.Tech student in Artificial Intelligence and Machine Learning at Intellipaat School of Technology, Pune, with expected graduation in 2030. Studying Python, HTML, and CSS in class; currently learning Git and GitHub. Exploring machine learning fundamentals, generative AI, and AI agents through interactive portfolio prototypes. Seeking an AI/ML internship to apply classroom foundations, learn from a team, and build practical experience.

EDUCATION

Bachelor of Technology (B.Tech), Artificial Intelligence and Machine Learning
Intellipaat School of Technology (IST), Pune | Expected graduation: 2030

TECHNICAL SKILLS

- **Programming:** Python (coursework; currently studying)
- **Web development:** HTML and CSS (coursework; foundational practice)
- **Developer tools:** Git and GitHub (currently learning version control and collaboration)
- **AI/ML learning areas:** Artificial intelligence, machine learning fundamentals, generative AI, and AI agents (areas of study and interest)

PROJECTS

Interactive AI/ML Learning Demos | Self-directed portfolio prototypes, AI-assisted
Created browser demos for an agent-style task planner, a classification threshold lab, and a prompt clarity checker. The planner and checker use simple rule-based logic; the metrics lab uses a fixed illustrative dataset to demonstrate precision, recall, and accuracy. These demos do not call an AI model or claim trained-model performance.
Implementation: HTML, CSS, and JavaScript. Portfolio demo.

Personal Portfolio Website | Live demo

TARGET ROLE

Seeking an entry-level AI/ML internship. Interested in foundational machine learning, AI applications, and agent workflows; motivated to learn, contribute, and grow through practical team experience.
